Cliff Collins

Sector Identification

Understanding the sector, its stakeholders and size is the key to effectively supporting the employers and skills development.

REFERENCING INTERNATIONAL & SECTOR QUALIFICATIONS WITH NATIONAL AND EUROPEAN FRAMEWORKS

Sector Skills Alliance

A Sector Skills Alliance is designed to tackle the skills agenda by aligning Vocational Education and Training (VET) systems with labour market needs. This can be done by:

- modernising VET by adapting to skills needs and integrating work-based learning
- strengthening the exchange of knowledge and best practices
- improving labour market mobility
- increasing the recognition of qualifications

Sector Qualification Framework

An SQF has the purpose to provide improved clarity for sectoral/ international qualifications where they are structured into units of learning outcomes to facilitate understanding and referencing.

Sector Qualification Framework

SQFs have to be designed in a transparent way to identify the unique occupations of the sector described by their knowledge, skills, competencies and autonomy.

Certifying organisation (CO)

- The CO is independent from the SSA
- It drives quality-assurance of qualification delivery
- Provides rigor and quality assurance of the outcomes for individual learners
- Improves trust and confidence at the European level

National Partner Cooperation (CO)

Competent and recognised national sector organisations need to lead the process in their country.

NCP/NQF

The national sector organisation with CO support apply for qualification inclusion to an NQF.

Professional Recognition Card

Individual learner recognised through sector or international registration process to support increased awareness and mobility

4. Intellectual outputs: **Report on progress (each IO 10 min)**

IO 2 - Research of EU28 on current use of qualifications based in Active Leisure, [ENSE \(P3\)](#).

IO 3 - Skills foresight, [EA \(P1\)](#); [EC-OE \(P2\)](#).
